VOLUME 22 NOS. 1–4 SPECIAL ISSUE

RECENT ADVANCES IN COMMINUTION

edited by
K. RAJAMANI and J.A. HERBST
The University of Utah, Comminution Center, 115 EMRO, Salt Lake City, UT 84112, U.S.A.

CONTENTS

Foreword vii
Correlation between probability of breakage and fragment size distribution of mineral particles
R. Weichert (Karlsruhe, F.R.G.) 1
Prediction of particle composition distribution after fragmentation of heterogeneous materials
G. Barbery and D. Leroux (Québec., Qué., Canada) 9
Characterization problems in communition – an overview
R. Hogg (University Park, Pa., U.S.A.) 25
Treatment of polished section data for detailed liberation analysis
J.D. Miller and C.L. Lin (Salt Lake City, Utah, U.S.A.) 41
Liberation modeling using automated image analysis
W.Z. Choi, G.T. Adel and R.H. Yoon (Blacksburg, Va., U.S.A. 59
Design considerations for large diameter ball mills
Y.C. Lo, J.A. Herbst, K. Rajamani and N. Arbiter (Salt Lake City, Utah, U.S.A.) 75
Diameter factors affecting ball mill scale-up
C.A. Rowland (Glendale, Wisc., U.S.A.) 95
The comminution of multicomponent feeds under batch and locked-cycle conditions: kinetics, simulation and energy distribution
D.W. Fuerstenau and K.S. Venkataraman (Berkeley, Calif., U.S.A.) 105
Multicomponent models of grinding and classification for scale-up from continuous small or pilot scale circuits
K.R. Weller, U.J. Sterns, E. Artone and W.J. Bruckard (Clayton, Vic., Australia) 119
Tracer study of mass transport and grinding in a rod mill
Z. Rogovin, A. Casali and J.A. Herbst (Salt Lake City, Utah, U.S.A.) 149
The interaction of flotation chemistry and size reduction in the recovery of a porphyry copper ore
R.R. Klimpel and R.D. Hansen (Midland, Mich., U.S.A.) 169
Influence of different grinding methods on floatability
E. Forssberg, S. Sundberg and Zhai Hongxin (Luleå, Sweden) 183
Modelling of screening operations
G. Ferrara, U. Preti and G.D. Schena (Trieste, Italy) 193
Phenomenological model of the hydrocyclone: model development and verification for single-phase flow
K.T. Hsieh and K. Rajamani (Salt Lake City, Utah, U.S.A.) 223
Potential energy savings in comminution by two-stage classification
D.A. Dahlstrom and Wai-Ping Kam (Salt Lake City, Utah, U.S.A.) 239
Rheological effects in grinding circuits
S.K. Kawatra and T.C. Eisele (Houghton, Mich., U.S.A.) 251
Stochastic simulation of filtering and control strategies for grinding circuits
D. Hodouin, Y. Dubé and R. Lanthier (Québec, Qué., Canada) 261
Optimal control of comminution operations
J.A. Herbst, F. Alba J., W.T. Pate (Salt Lake City, Utah, U.S.A.) and A.E. Oblad (Belo Horizonte, Brazil) 275

Supervisory control of a semi-autogenous grinding circuit
L.B. Hales (Salt Lake City, Utah, U.S.A.), J.L. Vanderbeek (Santa Rita, N.M., U.S.A.) and J.A. Herbst (Salt Lake City, Utah, U.S.A.) 297
Factors affecting wear in tumbling mills: influence of composition and microstructure
J.J. Moore (Minneapolis, Minn., U.S.A.), R. Perez (Medellin, Colombia), A. Gangopadhyay (Evanston, Ill., U.S.A.) and J.F. Eggert (Kentucky, U.S.A.) 313
Nature of corrosive and abrasive wear in ball mill grinding
I. Iwasaki, R.L. Pozzo (Minneapolis, Minn., U.S.A.), K.A. Natarajan (Bangalore, India), K. Adam (Athens, Greece) and J.N. Orlich (Erie, Pa., U.S.A.) 345
Laboratory abrasion and electrochemical test methods as a means of determining mechanism and rates of corrosion and wear in ball mills
C.H. Pitt, Y.M. Chang, M.E. Wadsworth and D. Kotlyar (Salt Lake City, Utah, U.S.A.) 361
Progress in abrasion-resistant materials for use in comminution processes
R.W. Durman (Wednesbury, Great Britain) 381
A first survey of grinding with high-compression roller mills
K. Schönert (Clausthal-Zellerfeld, F.R.G.) 401
High-intensity centrifugal milling – a practical solution
J.M. Boyes (North Ryde, N.S.W., Australia) 413
Recent developments in stirred ball milling
N. Stehr (Mannheim, F.R.G.) 431
